TECHNO-COMMERCIAL BID / PRICE PROPOSAL

In response to: **Capital Region Urban Transport (CRUT), Government of Odisha**
Tender No. 1376/CRUT | **Selection of Bus Operator for Procurement, Operation & Maintenance of 200 Electric Buses (MIDI) on Gross Cost Contract (GCC) basis for a period of 12 (10+2) years**

Bidder (Operator)	MetroLink Fleet Services Ltd.
Company Registration	U60221OR2017PLC028776
Bid Reference	GCC/200EB/2025
Contract Term	12 years (10 operational + 2 extension)
Fleet	200 x MIDI (9 m) AC electric buses
Assured kilometres	64,800 km / bus / year (as per RFP)
Delivery basis	Gross Cost Contract (operator paid per assured kilometre)

2. QUOTED PRICE

MetroLink Fleet offers the most competitive headline per-kilometre rate in this tender, based on a cost-optimised 250 kWh fleet:

Item	Quoted Rate (INR / assured km)
Per-kilometre Gross Cost Rate (AC MIDI, 9 m)	Rs 61.00 / km
(rate in words)	Rupees Sixty One only per kilometre

3. PRICE ADJUSTMENT / ESCALATION

In accordance with Clause 15 of the RFP, the Quoted Per-Kilometre Rate shall be revised once every six (6) months. The Payable Fee for any revision period shall be computed as per the following formula (triggered when any component index moves by more than 4% from its value on the Base Index Date, i.e. the Bid Due Date):

$$\text{Payable Fee} = \text{Quoted Rate} \times [\, 0.30 + 0.40 \times \text{CPI-IW} + 0.20 \times \text{WPI} + 0.10 \times \text{Elec} \,]$$

Index component	Symbol	Weight	Source series (Base = Bid Due Date)
Consumer Price Index (Industrial Workers)	CPI-IW	0.40	Labour Bureau, All-India CPI-IW
Wholesale Price Index (All Commodities)	WPI	0.20	Office of the Economic Adviser, WPI
Charging Electricity Tariff	Elec	0.10	State DISCOM LT-VII / EV tariff
Fixed (non-escalating) portion	-	0.30	Not indexed

Note: MetroLink's headline rate is the lowest, but 70% of the fee is indexed (CPI-IW 0.40, WPI 0.20, Electricity 0.10) and escalates with inflation over the 12-year term.

4. SUPPORTING COST BASIS (for information)

The Quoted Per-Kilometre Rate has been derived from the following lifecycle cost assumptions (grounded in prevailing Indian e-bus economics):

Cost component	Value	Basis
Electric bus capex (250 kWh)	Rs 0.92 crore / bus	LBNL/WRI (smaller battery)
Charging electricity tariff	Rs 6.00 / kWh	CESL multi-city benchmark
Energy consumption	0.85 kWh / km	ICCT BMTC range
Battery replacement	once, end of year 6	shorter-cycle assumption

Maintenance	Rs 4.20 / km	LBNL BEB maintenance

We confirm that the rates quoted are firm except for the price-adjustment mechanism stated in Clause 3 above, and remain valid for 180 days from the Bid Due Date. All figures are inclusive of charging electricity cost borne by the Operator, subject to the tariff pass-through and permissible kWh/km as per the RFP.

For and on behalf of the Bidder Authorised Signatory

SYNTHETIC DEMONSTRATION DOCUMENT - generated for the AwardShield project. Not a real bid. Figures are grounded in public data (CRUT RFP formula; CAG DTC Delhi audit rates; LBNL/WRI India e-bus TCO; CESL electricity tariffs).
